

Cloud Trail

WHY DO WE NEED CLOUDTRAIL?

The various capabilities of CloudTrail are essential to simplify operation analysis and troubleshooting. It directly contributes in achieving business goals faster.

TROUBLESHOOTING

BUSINESS AGILITY

WHAT IS CLOUDTRAIL?

Cloudtrail is a management service provided by AWS which enables governance, compliance, operational auditing as well as risk auditing of your AWS Account.

FEATURES OF CLOUDTRAIL

01

MULTI REGIONAL

EVENT HISTORY

02

03

FILE ENCRYPTION

FILE INTEGRITY

04

FUNCTIONALITY/WORKING

WHAT EXACTLY HAPPENS

Account activity occurs

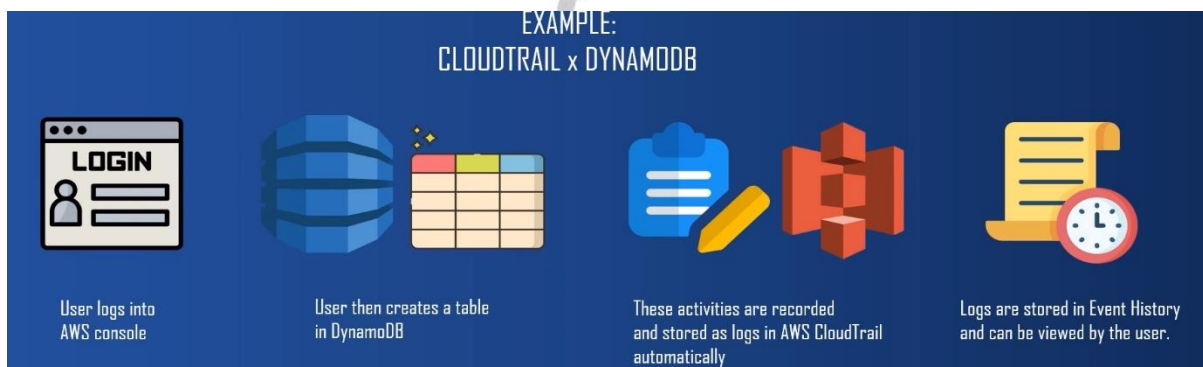

CloudTrail captures and records the activity of an event.

Recorded events are logged and dumped into an S3 bucket.

Not centralised to console. Only logs events in AWS CloudTrail and its integrated services

LIMITATIONS OF CLOUDTRAIL
